"In the third quarter of 2013, due to strong demands from our downstream customers, the actual shipment of polysilicon exceeded our original guidance by 29%. The shipment in the third quarter included 191 MT decrease in inventory balance. We have already booked out all of our remaining capacity through the end of the year. In September, we signed long-term agreements with three Chinese leading wafer manufacturers with the contracted volume accounted for over 70% of our current capacity from Xinjiang facilities. We believe with solar PV market continues to grow in the long run, the demand for high quality and low cost polysilicon will keep increasing."

"In the third quarter of 2013, it was the first time for both of our Xinjiang polysilicon facilities and Wanzhou wafer facilities to achieve positive gross margin on stand-alone basis. It was also the first time since the first quarter of 2012 that we generated positive operating cash inflow on quarterly basis at the company level. Our operating cash flow improved from negative \$24.3 million in the first quarter to positive \$8.8 million in the third quarter of 2013. In the fourth quarter of 2013, we expect that our Xinjiang polysilicon facilities will break even, and our Wanzhou wafer facilities will improve its gross margin to high single digit." Commented Dr. Gongda Yao, Chief Executive Officer of the Company.

"In October, our total production cost for polysilicon was reduced to \$15.16/kg. We are currently in the final stage of the 6,150MT expansion project. We will start trial production by end of November and our total production cost will be lowered to \$14/kg level when we complete the trail run."

"To best leverage our technical expertise and take advantage of the low utility cost in Xinjiang, the Board has officially approved our plan to further expand our capacity in Xinjiang from 6,150MT to 12,000 MT. We have already formed a dedicated team and started initial preparation works. We expect to complete the project and start pilot production by the end of 2014. Our cost will be further reduced to the level of \$12/kg when we fully ramp up the capacity." Dr. Yao concluded.

Third Quarter 2013 Results

Revenues

Revenues were \$29.6 million, compared to \$27.8 million in the second quarter of 2013 and \$21.1 million in the third quarter of 2012.

The Company generated revenues of \$22.9 million from polysilicon, compared to \$16.4 million in the second quarter of 2013, and \$19.4 million in the third quarter of 2012. The increase from the second quarter of 2013 was primarily due to higher sales volume and higher average selling prices.

The Company generated \$6.0 million from sales of wafers, compared to \$7.1 million in the second quarter of 2013 and \$0.7 million in the third guarter of 2012. The decrease from the second quarter of 2013 was primarily due to lower sales volume.

The Company also generated \$0.7 million from other businesses, such as sales of multi-crystal silicon blocks.
